

Comprehensive Water Management: Water Conservation + Leak Detection for Guaranteed Savings

Our holistic smart water management solution, comprising a meticulously coordinated set of components, works harmoniously to monitor, detect, and address water inefficiencies and threats proactively, significantly reducing risk and safeguarding your property value.

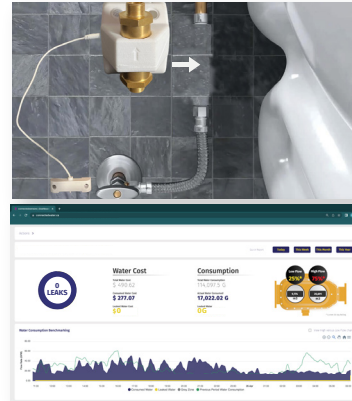

Did You Know:

80% of buildings lose 20-30% of their water due to leaks.

Master Your Water Usage

Water Monkey

Understanding your water usage is paramount. The Water Monkey, an advanced flow meter, tracks the water flowing through your pipes, providing realtime data on inefficiencies and leaks. This transforms guesswork into clear, actionable insights.

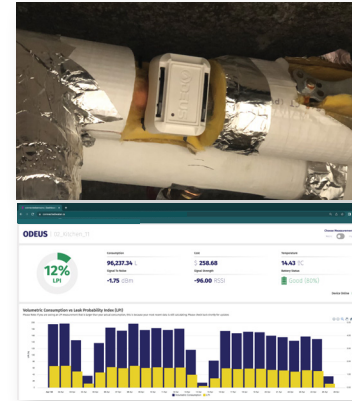

Did You Know:

Toilets are the primary cause of leaks in multi-dwelling buildings.

Eliminate Costly Leaks

Water Warden

Add Water Warden to your toilets to eliminate pesky leaks. This water-saving device controls water flow, activating only when a user is present and shutting off after use. Watch your water consumption decrease and savings soar.

Did You Know:

Leaks are dynamic and can go undetected without monitoring.

Track Plumbing Health

ODEUS

Next, install ODEUS to track your plumbing system with precision. It provides detailed insights, identifying leaks and inefficiencies in your infrastructure. Continuously monitor and optimize water use to ensure long-term efficiency and savings.

Did You Know:

Water accounts for 42% of global insurance claims costs.

Protect Against Floods

Water Sniffer

Extend your protection with the Water Sniffer. This flood sensor is always on guard, monitoring water, temperature, humidity and pressure levels throughout your building. It alerts you immediately to any issues, allowing swift action to prevent costly damage.
