

# Eliminate Hidden Water Risks Across Your Property

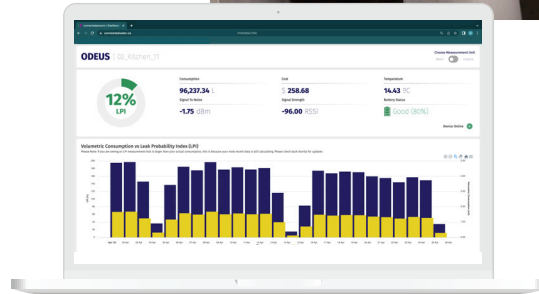

## Dynamic Leaks Can Wreak Havoc Without Smart Monitoring

Managing a property with countless fixtures and appliances often means you're stuck in a reactive cycle, only stepping in when something breaks or a tenant raises the alarm. But when it comes to water, the stakes are much higher. Without real-time insight into your water systems, you're rolling the dice on potential disasters—costly claims, soaring bills, and massive repair costs.

### Meet ODEUS

This powerful clamp-on sensor pinpoints leaks, burst pipes, and inefficiencies at the source, delivering real-time data on water usage. Optimize your system, cut costs, and protect your property—all while benefiting the environment

- ✔ Get granular litre-by-litre insights into water usage and flow to proactively detect potential leaks proactively.
- ✔ Receive instant alerts about unusual usage patterns and leaks to empower you to take immediate action.

- ✔ Track and compare historical water consumption to identify trends and potential risk areas.
- ✔ Track water consumption costs and the cost of leaks to analyze water utilization and ensure accurate billing.
- ✔ Monitor battery life, ensuring uninterrupted operation and timely replacements.
- ✔ Seamlessly monitor and manage multiple sensors across your property portfolio.
