# Slash Your Water Bills

+ Boost Sustainability

85% of buildings waste 35% of their water due to leaks.

Water waste isn't just about the drip in your faucet—it's a stealthy drain on your finances, inflating bills and leading to expensive repairs and damage. But it goes beyond that; it challenges our commitment to sustainability, straining local resources and amplifying drought impacts.

Meet the Water Monkey

The Water Monkey is your vigilant, AI-powered ally in water monitoring and conservation. Proactively detect leaks, optimize water usage, and maximize cost savings across your property portfolio.

- ✓ Minute-by-minute monitoring for swift anomaly detection and response.

- ✓ Real-time notifications for unusual usage and potential leaks.

- ✓ Cost & consumption overviews for accurate billing and analysis.

- ✓ Historial water usage benchmarking to spot trends and risks.

- ✓ Per unit analysis to evaluate fair, moderate or excessive water use per building unit.

- ✓ Battery life monitoring for continuous operation.

- ✓ No invasive plumbing or technical expertise required - simply attach it to your water meter in seconds.
